

NOTICE OF COMMENCEMENT OF ENVIRONMENTAL SCREENING PROCESS FOR THE REMASCO ENERGY PRODUCTION FACILITIES

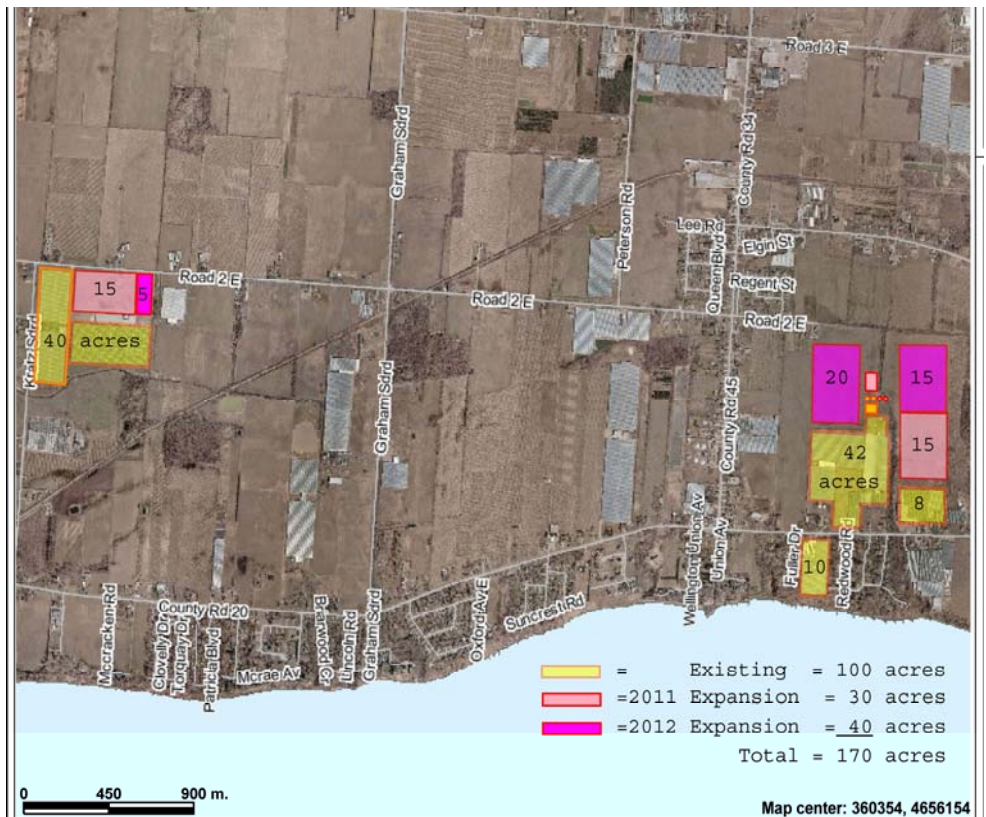

REMASCO has operated a pilot energy production facility at the Southshore Greenhouse in Kingsville for 3 years under the Provisional Certificate of Approval (C of A) No. 2887-7AAQTX. This Approval was issued to allow the Company to develop and test its technology to provide the necessary operating information to obtain a full approval to utilize the ENERPAX™ fuel pellets in greenhouse heating and co-generation systems.

REMASCO has initiated the Environmental Screening Process (ESP) in accordance with Ontario Regulation 101/07 under the *Environmental Assessment Act* (EAA). This regulation addresses the use of thermal treatment facilities on industrial sites when the energy is used on the site where the energy is generated. Such projects are deemed exempt from Part II of the EAA if the environmental screening process is completed. The ESP is intended to determine the feasibility of expanding the existing REMASCO energy facility at Southshore to include a cogeneration facility that will heat and power the greenhouses and to install a REMASCO energy facility to heat the Agriville greenhouse facility. The two facilities are shown on the attached map.

Members of the public, stakeholder groups and agencies, and other interested persons are encouraged to actively participate in the planning process by attending consultation opportunities or contacting staff directly with comments or questions.

Consultation opportunities are planned throughout the process and will be advertised in a variety of formats including: the REMASCO website (www.remasco.ca), regional newspapers, and direct mailings to interested parties.

REMASCO, Renewable Energy Management & Services Company, is incorporated under 2132656 Ontario Inc. The Company develops and operates energy production facilities using biomass, solid waste fuel pellets and other renewable fuels.
